

About our service

A short summary of our Statement of Purpose

Caremore Group Ltd is Ofsted registered supported accommodation in south London for young people aged 16 and 17 who are looked after or are care leavers. We provide support, not care: a safe home, a consistent team and help to become independent.

Our homes

Where	Homes in residential areas of south London, close to public transport, shops, colleges and local services.
Type of home	Ring-fenced shared homes: young people only live with others placed by Caremore, never with adults or anyone outside the service.
Bedrooms	Every young person has their own private bedroom, with shared kitchen and living space.
Staffing	Staff are on site 24 hours a day whenever a young person lives there, with a manager on call at all times.

Every placement is matched carefully to the home and the other young people living there. Full details of each home are shared with placing authorities when a referral is discussed.

Who we support

Young people who need support to build independence, including those with experience of trauma, going missing, exploitation risk, substance use, emotional or mental health needs, or conditions such as ADHD, where these can be met safely in supported accommodation. Every referral is assessed for matching and the impact on other young people before we decide. Where we cannot meet a need safely, we say so in writing.

How we support

- A support plan agreed with the young person and their social worker, reviewed at least monthly.
- Regular key work with a named keyworker on safety, health, money, relationships and independence.
- Registration with a GP, dentist and optician within 7 days of arrival.
- An education, training or employment plan within 10 working days, reviewed monthly.
- Independence skills assessed within 4 weeks and practised every week, with move-on planning from 17 and a half.
- Weekly updates to the placing authority and attendance at reviews and professionals meetings.

Young people's voice

Young people help write their own plans, house meetings are held at least monthly, and every young person is told how to contact an independent advocate.
